

GREEN PROCUREMENT POLICY

To support Environment conservation, we require that our suppliers / contractors adopt suitable and robust management practices for environmental protection. We recommend to supplier/ contractor that environmental protection policies and practices follow the relevant policy principles laid out by **GHCL Limited** for Environment, namely:

- **Management Systems** – implementation of effective environment management system to ensure awareness of the workforce and encouraging them to act in an environmentally responsible manner.
- **Continuous Improvement** – the environmental impact of processes and products will be assessed and continuous improvement objectives and targets will be established.
- **Climate Change** – To monitor and minimise greenhouse gas emissions by use of appropriate technology.
- **Responsible use of Resources** – make efficient use of energy, raw materials and water.
- **Product Stewardship** – consideration to be given to re-use and recycling and the environmental effects of products throughout their life-cycle.
- **Respect the environment**, working with suppliers to improve the environmental profile of our products over their full life cycle.
- **Biodiversity** – wildlife habitats & Green Belt in and around suppliers' sites will be respected and, where opportunities arise to do so in a way that is conducive to business operations, they will be progressively enhanced for the benefit of nature.

Note :GHCL recognise that the nature of the operations of our suppliers vary widely and so that the emphasis of environmental management may vary between suppliers.

Chief Operating Officer
